

# ART CONTEST

## Renewable energy, photovoltaics and environmental protection.

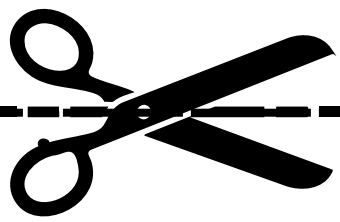

**Voltmax Sàrl** is a company that helps families in Luxembourg live modern, ecologically sound, and... more affordably. For many years, we have been installing solar panels, solar roofs, heat pumps, and air conditioning to make homes comfortable and environmentally friendly. We also insulate buildings and replace windows and doors, ensuring energy and heat doesn't escape from houses.

Our mission is to support residents at every stage – from concept, through design and installation, to assistance with obtaining financing. We want every family to benefit from clean energy and lower bills.

We are delighted to support the school art competition and encourage children to discover how the sun can power our future! ☀️🌟
